NICKELS: There are buyers for all of the normally traded Buffalo rolls, at bid levels, if they are original. The same cannot be said for the Jefferson series. It is subdued for the time being and the near future does not look much better.

DIMES: Original Mercury dime rolls see only scattered activity of late, but that's mostly because they are not offered on a regular basis. When they are listed for sale, the second caller usually hears, "sorry, they're gone".

BU Roosevelt dime rolls appear to be strengthening somewhat. Discounted lots are infrequently seen, although active bidders are just as invisible. When an occasional lot is offered, it is usually bought rather quickly. Changes are minimal this week.

QUARTERS: BU Washington quarters appear to be stable at today's levels. Discounted lots have not been offered lately and this is likely to be taken as a good sign by roll buyers. When bidders become active, this series could make a strong comeback.

HALVES: The Franklin series is beginning to show signs of life. Buyers are limiting their bids but, at least, changes are to the upside. It has become obvious that attempts to buy at discounted levels will usually go unfilled. Whether this is the time for the cycle to start moving back up, only time will tell.

The Kennedy series is also showing plus signs for the silver rolls. This may be just a reaction to the bullion markets, but most dealers are happy with it, nonetheless.

DOLLARS: No, the plus sign did not get stuck on the typewriter. The MS-64 dollar column has more than just a rash of plus signs, it is covered from top to bottom. Although many dealers are active in this series, these higher bids are mostly a result of one higher buyer attempting to run this market up. Nevertheless, he is serious, as he will take "raw" or sight unseen PCGS coins at these levels. This may help MS-65's also, as this week finds no minus signs. If this confidence can hold for a few weeks, maybe this recent downturn will have reached the bottom of the cycle and be ready to move in a positive direction.

PROOF SETS and MINT SETS: Both of these areas appear quite stable at today's levels. 1955 proof sets are up $2 to $60 bid and the 1983-S Prestige set is now at $44. Especially strong at current bids are 1974 thru 1977 mint sets, with the 1976-S (3 pc.) set at a higher $8.40 bid.

COMMEMORATIVES: Gem and near-gem silver commems seem to have reached a bottom. There is general support at current levels and most dealers feel more comfortable at these levels than they did two or three months ago. By the way, although gold commems do not get much mention, they are very solid at today's levels. There are just not enough around to reflect a constant market.

TYPE: Changes here are restricted to just a few PR-63, 64, and 65 issues, Three-cent nickels, Shield and Liberty nickels and a few MS-65 nickel coins. Many dealers are still confused as to which direction this market is headed.

GOLD: The Saint Gaudens displays a plus sign for every grade this week (VF thru MS-65). Being the favorite gold coin of most numismatists, it is also the leading indicator of the U.S. gold coin market. And expectedly, many other issues also reveal plus signs. Hopefully, this will be a continuous "Bull Market" that runs during the Long Beach Coin Show and beyond.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may he found in the Monthly Summary.

PCGS BUYERS' ALERT!

THE FOLLOWING WAS TAKEN FROM THE AUGUST 15, 1986 THE COIN DEALER NEWSLETTER:

Editor's Note: In light of the fact that many dealers and groups are trying to solve the grading problems, the CDN was witness to one such attempt. The PCGS has now graded over 100,000 coins in the first six months of its existence. It is quite understandable that any service that grades as many as 20,000 coins per month could make a few mistakes. We saw a PCGS principal re-purchase several dozen possibly overgraded coins (approximately $50,000 worth) from several PCGS dealers. To our knowledge, this is the first time any of the grading services have put their money on the line as a form of quality control and we would like to see more of it.

Now consider this: If as much as $50,000 worth of possibly overgraded coins were purchased from only several PCGS Dealers at ANA, imagine how many possibly overgraded coins were not purchased back from non-authorized or other authorized PCGS Dealers at ANA or the tens of thousands of coins not at the ANA!!!

Have you looked at your PCGS portfolio lately?

Clearly, you have no choice but to buy SELECT QUALITY and not random quality PCGS coins

GEM MERCS, MS-64 DOLLARS IN SPOTLIGHT

Mint State Gold Stable, Despite Lower Bullion

The Market in Depth

Gem Mercury dimes are beginning to take on added importance as many dealers realize the difficulties encountered when trying to locate near-perfect specimens. Over the last decade, such emphasis was placed on split-band gems that a flat-band coin was considered second best. Now that most numismatists realize that the majority of full-split-band specimens are less than 65 quality, flat-band 65's are looked at with much more interest. As one can see from the following price comparisons, although bids may have fluctuated up and down between 1981 and 1985, bids were relatively the same or fell slightly when comparing those two time periods. Whereas, over the last year,the majority of bids have increased substantially, indicating the dealers' changing attitudes concerning these issues.

This Week's Market

CENTS: Most activity in the Lincoln series is limited to the late-date rolls. Several different dates are wanted at current bids; proof rolls of 1972-S, 73-S, 75-S, 80-S, and 84-S. Not to be left out, one new bidder has appeared for substantial quantities of original rolls of most dates in the '40's, at current levels.

NICKELS: Original Buffalo nickel rolls are relatively easy to sell at today's levels, but this past week has seen very limited action in the Jefferson series.

DIMES: Mercury dime rolls see no current bid changes, although buyers are still "in" at today's levels. BU Roosevelt rolls finds few changes, mostly to the downside. Two dates have increased 1957-D at $83 bid and 1961 at $30 bid.

QUARTERS: Washington quarter rolls suffered no losses again this week leaving one with the impression that this series is in a state of recovery. There seem to be few dealers willing to discount rolls any further.

HALVES: Again this week the BU Kennedy rolls are showing the most activity. The majority of issues from 1964 thru 1969 are higher. In the Franklin series, BU rolls continue to be somewhat difficult to locate at current levels. With this in mind, a few dates have advanced. The few issues which still appear relatively plentiful are 1955, 1963-P and D.

DOLLARS: MS-64 dollars are once again leading this area of the market. One major buyer is having a difficult time in filling his want lists. Although common dates have not advanced, they remain quite steady at current levels. This week's Long Beach Convention should prove very active for dollar dealers, especially in MS-64 grades.

PROOF SETS and MINT SETS: Proof sets continue as one of the mainstays for the majority of dealers who own retail stores. It seems like many dealers are already stocking up for the holiday season. While mint sets are popular, they just don't have the same eye appeal as proof sets do to the collector.

COMMEMORATIVES: Silver commems seem to be rather stable in all grades (MS-60 thru MS-65). There seem to be buyers and sellers in all grades and they usually get together on price.

TYPE: Most of the changes this week in type coins are to the downside. Sellers continue to outnumber buyers in most areas of mint state and proof. The minuses are not confined to a particular grade as they appear in 63 through 65.

GOLD: Lower bullion prices have had the expected effect on U.S. gold. Minus signs appear on many issues in VF thru AU. But, mint state issues remain strong at current levels. Again, Long Beach will be a good indicator of this series.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $423.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely finer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the marits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chert are for "typical" coins. These usuelly average MS-63 but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

DEALERS FIND LONG BEACH EXTREMELY ACTIVE

Market Appears Solid In Most Areas

The Market in Depth

One complaint. That's all that was heard at the Long Beach Convention this past week. But, it was mentioned over and over again by a majority of the dealers. "There is not enough fresh material to satisfy current demand." This was by far one of the most successful, if not the most successful shows of the year for many dealers. Most dealers came to this show with want lists to be filled and completed the biggest portion of them by Friday afternoon. At most shows there are a certain amount of dealers who do well while some others may have a poor show. At Long Beach, not one dealer reported having a poor show. Now, obviously, we could not talk to every dealer, but usually, if a show is slow, the dealers who do not fare so well have plenty of time to complain. The Long Beach Show was active throughout and dealers remained quite busy.

All areas of the market seemed to be active: MS-64 and 65 dollars, commemoratives, and Walkers, gem Mercs and Type, and all grades of U.S. gold coins. Clearly, the easiest selling issues are gold coins. Even when bid prices fall a little for circulated gold, as a result of the major market makers, it seems that some dealers will still have to pay at least ask or more in order to buy enough coins for their clients. This may seem contradictory to the clients, but, it is sometimes more difficult to buy coins at current levels when they have fallen slightly, as sellers feel the downturn is temporary and will reverse itself quickly.

Speaking of reversals, commems appear to be receiving much more attention this past week. This series finds the market makers more than willing to pay current bids or higher for properly graded material. Nice coins were easy sellers at Long Beach if they were priced according to grade.

Many dealers were trying to buy gem Mercury dimes, but quantities are strictly limited for the pre-1930 issues. If a buyer passes on a properly graded coin within the current bid/ask level, he usually will not get a second chance, as one of the other market makers will snap it up.

The overall outlook of the rare coin market appears to be very solid today as viewed by the majority of dealers. They are cautiously optimistic, or, better yet, skeptical of the long term strength of this current market. This skepticism may keep the market steady throughout the remainder of the year, then the FUN Show may bring on the realization that we are in a full-fledged "Bull" market. It isn't that some dealers don't feel a bull market now, it's just that there are so many non-believers that keep this market from exploding.

This Week's Market

CENTS: BU Lincoln rolls found no changes this past week as most dealers were either attending shows or concentrating on more active areas of the coin market.

NICKELS: BU Jefferson rolls were no more active than Lincolns. There just is not enough interest in these series to warrant spending time and money on them.

DIMES: Although the few changes in the Roosevelt series are to the downside, this series remains fairly stable. Most dealers will not discount rolls as they feel prices are too low at this time. Most issues cannot be located in quantities more than two at a time.

QUARTERS: Washington quarter rolls are relatively quiet, but secure at today's levels. Like Roosevelt dimes, dealers are not rushing out to sell them at discounted prices. There does appear to be consistent interest in early (1932-40) issues at current bids. Various dealers are looking for MS-63 to MS-65 specimens with occasional wants appearing for the more difficult issues in MS-60.

HALVES: Single W.L. halves are very stable at today's levels. Most issues are wanted in all mint state grades. Early issues 1916-1929 are very difficult to locate in MS-64 & 65 and there are at least two strong buyers of all these issues.

BU Franklin rolls will usually command bid levels when offered. The problem is not many are being offered of late. And when a dealer needs a few rolls, especially issues prior to 1954, they seem to be difficult to pry loose; like the 1952-D.

DOLLARS: Original BU dollar rolls are strong at today's levels. Yet, it all depends on the quality within. If the coins are all MS-60, then the buy price will be figured according to MS-60 bids. If there is a good quality mix, MS-60 to MS-63 or better, then getting bid or more is not a problem.

The 40% BU Ike dollars are still hot! A few dealers keep running buys for substantial quantities at current levels.

PROOF SETS and MINT SETS: Proof sets and mint sets are stable at current levels. The 1986 mint set is listed now at $6.50 bid and $7.75 ask.

COMMEMORATIVES: Statue of Liberty sets are settling somewhat lower these days as more and more sellers appear at just under ask levels. They aren't falling much though, so they don't seem necessarily weak. There are a number of dealers across the country who are very active marketmakers.

TYPE: There are no changes in this area as the majority of properly graded coins traded at or near current levels this past week. Most dealers felt there was a lack of material at the Long Beach Show.

GOLD: With the upcoming release of the American Gold Eagle near, we though it would be interesting to list current ($438 gold) bid/ask levels for the U.S. Gold Medallions. Unlike the American Gold Eagles, which have specific denominations, the gold medals are not legal tender. They trade for their gold and collector value.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor check marks. Definitely better than a MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

"CAN WE TALK?"

Good. Because we want you to meet the real Mike DeFalco:

The Numismatist

One of the only coin dealers I know who really has a plan for getting *all* of his clients out. And remember, you haven't made a killing in rare coins until you sell.

— Gary North
Editor, REMNANT REVIEW

I have bought and sold coins with Mike for nearly 10 years, and every deal has been clean, quick and friendly. When customers ask me to recommend some of the best dealers in the country, Mike is always on the list.

— Bruce Amspacher
Co-Founder, PCGS

Mike DeFalco, a quality guy with quality coins. Big League all the way. I have recommended my customers to him for over 5 years.

— Dick Armstrong
Armstrong Rare Coins

The Company

Mike DeFalco is one of America's most knowledgeable Numismatists, recognized industry-wide for his stand on integrity and quality. Mr. De Falco and his company can count on my wholehearted endorsement of their expertise and record of providing honest and fair treatment to their clients.

— Martin Paul
President
The Rarities Group, Inc.

I know where to go when I want an honest and upfront Bid or Ask for coins — Mike DeFalco. A refreshing change from most dealers' attitudes.

— Gary Fernandez
Fernandez/Armstrong
Rare Coins

Mike DeFalco has gained a great deal of respect in the coin industry, and I personally think his portfolios are accurately graded and top quality.

The Newsletter

"I subscribe to every major rare coin advisory, and up to now, thought that David Hall's Inside View was the only truly professional newsletter. Well, MARKETWISE is definitely its equal, and is one of the only two newsletters that I would personally recommend."

— Hannes Tulving, President
HTRCI

"Each edition of MARKETWISE gets better and better. The January, 1986 issue was a real treat. There was not one coin or projection that I disagreed with.

— James M. DiGeorgia,
Numismatic Wholesalers, Ltd.

"What I like best about MARKETWISE is that you are living in the real world, speaking like a human being as opposed to 'Mr. Expert' and providing your readers with practical advice."

— Les Fox, Publisher
The Fortune Teller

The Bottom Line

". . . I received your check for the coins I sold back to you. Your offer was very fair and somewhat surprising. The past six weeks I had been trying to sell back coins to other dealers I'd done business with, and I was getting the usual run-around or ridiculous offers. It's nice to know there is at least one honest dealer out there. Thank You again."

— D.R., Hazel Park, MI

"I appreciate the quick and professional mode in which you operate. You make 'numismatic investments' a reality. I will surely be doing business with you in the future as I build my own rare coin collection for both pleasure and profit."

— G.G., Phoenix, AZ

". . . You have an excellent reputation for fairness and integrity in your business. You are one of four or five that I instinctively believe I can trust for an honest and fair relationship."

— J.C., Valparaiso, IN

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63--but may also include some MS 60 and MS 66 examples. For strictly graded MS 66 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

MARKET READIES FOR AMERICAN GOLD EAGLES

U. S. Gold Steady In All Grades

The Market in Depth

Stack's will conduct another one of its fine auctions on October 22, 23, in New York City. The auction will be covered in two sessions of over 1100 lots. Stack's is one of the last major firms to still grade coins "the old fashion way," with adjectives. Nevertheless, their grading corresponds with the modern use of numerals.

MS-60 - - - - - - - - Uncirculated
MS-63 - - - - - - - - Choice Brilliant Uncirculated
MS-65 - - - - - - - - Gem Brilliant Uncirculated

Anyway, this auction contains many fine type coins including early Bust, Seated, and Barber material, along with commems and U.S. gold. Some of the highlights to watch for are a Ch. BU 1933 $10 Indian, a 1921 and 1922 Matte proof silver dollars, a proof 1875 $3 gold, a proof 1879 Stella, and a 1931 $20 St. Gaudens in Ch. BU. For an auction catalogue and a list of prices realized please contact Stack's directly.

The American Gold Eagle is scheduled for release October 20th. The CDN will list the four denominations ($50, $25, $10, and $5) as 1 oz., 1/2 oz., 1/4 oz., and 1/10 oz. under the gold bullion heading as these coins are intended to compete with foreign bullion coins of the same weight. However, the American Eagles are legal tender, authorized by the Congress of the United States and signed into law by President Reagan on December 17, 1985.

All the gold coins will be minted at the West Point Bullion Depository in New York. When the silver 1 oz. coin is released, possibly in December, they will be minted at the San Francisco Assay Office. The gold coins will be available from authorized dealers and financial institutions at the market price plus a premium. This program will be supported by a national advertising campaign.

Gem Mercury dimes (flat bands) continue to be one of the hottest series going---pricewise anyway. Prices are forging ahead, yet, dealers are having a very difficult time in locating coins prior to 1930. Collectors and investors see the price increases and climb on the bandwagon only to make the series more sensitive to demands while orders remain unfilled. Last week's Monthly Summary carried a long run of plus signs for almost every date from 1916 through 1929. And, even now, some dealers are willing to pay over these levels to try and corral whatever specimens may arise to see the light of day.

This Week's Market

CENTS: Bid levels have not changed for BU Lincoln rolls, but there were bidders for specific amounts of various dates. This series remains sluggish except for the following issues, which are wanted at bid: 1940-P, D, 41-P, 45-P, S, 46-S, and 47-S.

NICKELS: Not much to report in the Jefferson series as bidders infrequently show interest. The only changes this week were found for 1940-D at a lower $65 bid, while the 1943-P roll is wanted at a higher $145.

DIMES: Rolls of BU Roosevelt dimes have remained steady this past week with a few issues experiencing changes. The 1958-D and 1961 are both higher at $46 bid and $31 bid, respectively. The 1952-D roll is lower at $78 bid.

QUARTERS: This week finds only one price change for BU Washington quarters. The 1947-D is lower at $250 bid. It is amazing how some of the earlier issues, prior to 1954, may appear soft when, in fact, there are very few rolls actually available. This proves how the psychology of the buyers of a particular series can make that series appear weaker than it actually is.

HALVES: Although BU Walking Liberty half singles are very active, MS-60 thru MS-65, it is becoming more apparent that original rolls are not trading as they were in the past. If a dealer is lucky enough to locate original rolls, he will usually break them down and sell them to the higher buyers. This is the main reason why roll activity and changes seem to be stagnant.

BU Franklin rolls are steady at today's levels with a couple issues now bid higher. The 1956 and 57 rolls are now bid at $200 and $185, respectively.

DOLLARS: Circulated Carson City dollars are very active at higher levels, especially the 1881-CC, 84-CC, and 85-CC in VG thru AU. MS-64 and 65 dollars appear steady at current bids with a number of dealers very actively seeking the rare dates. However, they are almost impossible to locate.

PROOF SETS and MINT SETS: The 1956 thru 1963 proof sets are very active as most are at higher bids. The 1970-S small date has fallen to $100 bid. Mint sets seem to be ignored but, discounted lots do not appear very often. The 1970 and 1976 (3 pc. 40%) mint sets have increased this week.

COMMEMORATIVES: Statue of Liberty sets have fallen this week. The 3 piece BU set is $520 and the proof set is $390. The six piece set is $985 bid. The 1986-W $5 gold has fallen in both BU and proof.

The Olympic $10 gold pieces are lower in proof 1984-P and D mints. The 1983-P and 84-P BU dollars are also lower this week.

TYPE: Very little has changed in the way of type coins. Most dealers feel properly graded and proportionately priced type is a good buy right now, but it seems that they are waiting for their clients to lead the way with want lists.

GOLD: Price levels for U.S. gold coins appear relatively steady at this time. This does not mean there is less activity, it's just that most transactions are occurring within current bid/ask levels.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $433.75 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks, although none on an MS-61 or better have eye appeal.

Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. Marks are only a small (but varying) percentage of available unimpaired specimens of any date. Must have eye appeal.

MS-64 (UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). May exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. Marks are only a small (but varying) percentage of available unimpaired specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces on both sides.

When Should I Buy?

In a recent Barrons interview titled "Aching Greenback" commodity analyst Al Friedberg predicts a weaker dollar and a strong bull market in gold over the next two years. It was Friedberg who forecase the decline of crude oil prices from $30 to $10 per barrell.

Proven Performance.

In previous bull markets in gold bullion, high quality U.S. gold coins have outperformed the metal itself. We have it on good authority that one of the nation's most influential hard asset advocates will soon be recommending and selling $20 Saints in MS-63 condition. Accordingly we believe that a substantial increase in demand for MS-63 Saints will result. Simple economics of supply and demand would seem to indicate a significant potential for price appreciation.

Please contact us for daily 2-way liquid markets on accurately graded PCGS coins. We have approximately 2500 coins in PCGS holders in inventory at the present time for immediate delivery.

Every PCGS coin is graded by a minimum of four of the world's top rare coin grading experts (and grade verified by a fifth expert). A minimum of three of these experts must agree on the grade of a coin before a grade is assigned by PCGS.

If you would like to receive our weekly buy/sell quotes, send us your name, address and telephone number. If you wish to buy or sell coins today, call us for our competitive quotes.

Unlike the other grading services, where their liability ends when they have graded the coin, PCGS guarantees the grade of each and every coin.

We are currently one of the 53 active dealers who must make a two way market. These dealers have combined numismatic experience of over 800 years and they've sold over 4 billion dollars worth of rare coins. Joel Rettew has been buying and selling Rare Coins since 1953 and is a major market maker in PCGS coins.

PCGS coins are accepted by some lenders as collateral without further appraisal or grading. Get in on the the ground floor with the designer coins of the 1990's.

We will be able to supply you with the new U.S. Gold Eagles at very competitive prices with immediate delivery.

We've conveniently located with offices in Newport Beach and Palm Springs.

MS 65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereteristics es the MS-65 --but with the additional feature of deep mirror prooflike surfaces both sides

MS 67 & MS 67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63- -but may also include some MS 60 and MS 65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

MS-63 SAINTS CONTINUE UPWARD PRESSURE

Trading Levels For American Eagles On Gold Chart

The Market in Depth

In spite of the fact that bid levels have seen only nominal changes in the BU roll charts over the last few months, the majority of the silver issues are firm at today's levels. It should be pointed out that today's discounted selling lists are few and far between. Even when something does appear it is usually quite limited in number of rolls and dates available. Also, the usual bargain-hunters aren't trying as hard; they feel it is just a waste of time as sellers don't want to give up inventory at today's "low" levels. If a dealer gets an order for specific dates, it is not likely that he would find anyone trying to get rid of the very same rolls at anything less than bid or more.

Speaking of BU rolls, silver dollars are beginning to strengthen considerably. Of course, put-together rolls of MS-60's will not work at roll bids, they will only bring MS-60 money. The rolls must be original with a good mix of MS-60 - MS-63 coins in order to realize current roll bid levels, but there are a number of new bidders now needing large quantities of all dates and they are willing to pay at least bid. And in many cases, rolls which usually carried a larger premium in the past can be purchased at today's "reasonable" levels with the possibility of future price increases.

All series of rare coins have cycles and BU dollar rolls are no exception. They seemed to have stayed near the bottom of this current cycle for an extended period of time. This downward trend began over a year ago, just before ANA in August. On the positive side is the fact that unpicked rolls have been relatively stable for the last four months. Nevertheless, the major reason for dollar rolls falling in price is "cherry picking."

"Cherry picking" of rolls has gone on ever since collectors wanted the nicest coin available. At first, there were few collectors and the quality of rolls did not diminish markedly. As more and more collectors entered the hobby, it was only natural that quality would diminish within rolls until the time came that rolls very consistently contained only one or two low-end grades. In fact, some dates used to be traded by the roll on a casual basis, such as, 1881-CC, 83-S, 85-S, 86-O, S, 87-S, 88-S, 89-O, S, 91-P, O, 92-P, CC, O, 93-P, CC, 94-O, S, 96-O, 97-O, 98-S, 99-S, 1900-S, 1901-P, S, 02-S; Peace dollars---1921-P, 24-S, 25-S, 28-P, and even 1934-S. All of these dates were listed in the early years of the CDN. As time goes by other rolls will be relegated to the "singles only" category, as well as many other series which are now commonly traded as rolls.

Sales have begun for the American Gold Eagles. Activity appears to be strong across the country, but the major problem encountered so far is that the general public feels they should be able to buy them at their face value. Of course, this is not so. We have listed the current wholesale bid/ask on the front page (Bullion Gold) so that it will be readily available for information to your customers.

This Week's Market

CENTS: Activity has picked up somewhat for specific dates within the Lincoln series. A few of the earlier BU rolls are wanted at bid, but for the most part, needs are limited to one or two rolls of each date. Specific dates wanted are 1935-S, 36-S, 37-D, 39-P, 40-P, D, 41-P, 48-P, D, and a few others in the 50's.

NICKELS: BU Jefferson nickel rolls are seeing considerably more action for various dates, but most of it is to the downside slightly. War nickel rolls seem available within current bids, while the 1942-S and 45-P are even lower. The 1947-S and 48-S are lower while the lone plus sign belongs to the 1950-D roll at $190 bid.

DIMES: Original Mercury dime rolls are generally active at today's levels with the 1942-D and 43-D rolls even higher. As for Roosevelt rolls, this series is mostly stable with minor exceptions for the 1946-D and 47-S, both lower.

QUARTERS: BU Washington quarter rolls appear stable at today's levels. Sellers are not attempting to dump rolls at discounted levels, in fact, most will still command ask from occasional buyers. The only date lower this week is the 1955-D at $145 bid.

HALVES: As we've stated recently, occasional rolls of BU Walking Lib halves are offered on the market at lower levels, thus, causing bids to fall. Such was the case this past week as the 1939-D fell to $2900 bid. The BU Franklin series remains stable with one date higher, 1952-D at $235. The Kennedy 1965, 66, and 67 sms rolls have strengthened as some buyers are looking for bag quantities.

DOLLARS: The majority of dollars are stable at current levels in all grades. Bidders are visible for MS-63 and lower grades, more so than for the higher grades. This is most likely because most MS-64's and 65's are in the process of being certified and buyers just don't want to waste their time with bids. On the other hand, dealers with this material are not actively trying to dump it at discount prices either.

PROOF SETS and MINT SETS: The 1964 proof set has risen to $12 bid. The rest of this series is very solid with 1950 to 1963 being actively sought at current bids. Mint sets remain steady at current bids, but trades do not take place as often as with proof sets.

COMMEMORATIVES: Silver commems are steady at today's levels, in all grades. Of course, there are bargain hunters, but sellers seem to be holding out for at least bid in the majority of cases. Gold commems don't appear to be as active, but, don't be mislead, if the coins are available any number of dealers will pay bid or more.

TYPE: Most issues in the type area seem to be in limbo. Most dealers may be classified the same way as they are not sure which direction this market is headed. If and when someone leads the way, type could take off on a long profitable run.

GOLD: Apparently someone miscalculated the popularity of the fractional American Eagles and concentrated more on the 1 oz coins. So there are limited supplies of fractionals which will cause some delays at the outset. The 1/2 oz and 1/4 oz are in shortest supply with the 1/10 oz somewhat more plentiful.

MS-63 Saints are leading the gold series. Even though they may be more readily available than higher grade coins, many dealers feel they have room to increase in value.

BULLION & FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion releted gold coins in this issue ere figured on a basis of gold at $426.25 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 Very slight surface marks and a few very minor blemishes. Must have eye appeal and be above average in all respects.

MS-63 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-61. Must have eye appeal.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but very real) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but very real) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

A BUYER'S GUIDE

TO THE GRADING & MINTING CHARACTERISTICS OF UNITED STATES COMMEMORATIVE COINS

BY RAY MERCER

with a foreword by James S. Iacovo

VOLUME ONE

"HOW TO LOOK AT A COIN"; the perfect companion to "A BUYER'S GUIDE."

Back in July of 1985, Ray Mercer wrote a detailed, 20 page report for **THE NUMISMATIC INVESTMENT JOURNAL** (Vol. 4, No. 7/8) devoted to the subject of grading.

This highly informative and easy to understand report takes you on a step by step journey through the process of learning how to skillfully grade your coins. In depth topics include detailed explanations on luster, strike, die definition, focal points, detracting marks, planchet abrasion, eye appeal, and toning. Dipping and cleaning are frankly discussed along with the need for proper lighting and the absence of stress. This outstanding issue of **THE NUMISMATIC INVESTMENT JOURNAL** is a must for every collector/investor who seriously desires to improve upon his/her grading skills and understand our ever-changing marketplace. Completely filled with important text, it makes a perfect companion to the ideas and illustrations featured in **A BUYER'S GUIDE.**

luster strike marks & toning: defined.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 -but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

After one week of sales, the 1 oz. American Eagle appears destined to be one of the most actively traded bullion coins. When the initial supply blankets the market, the premium will settle and probably remain stable. Right now, premiums range from 4%-5% on the buy side, to 6%-7% on the sell side. (Remember, these are wholesale spreads). Of course, since the fractional coins seem to be somewhat short of supply (many dealers are afraid to confirm possible delivery dates), premiums, for the time being, havesky-rocketed. Some dealers have paid as much as $925 per complete four-piece set. That worked out to a 25% premium over bullion for one each of the 1 oz., 1/2 oz., 1/4 oz., and 1/10 oz. Many of the market-makers are quoting high-premium buy prices, but, will not quote sells until they have coins in hand. A constant buy premium for the fractionals is: 1/2 oz. — gold + 13%, 1/4 oz. — gold + 18%, and 1/10 oz. — gold + 22%.

It must be noted that any number of sales do take place at atrociously high premiums for the fractionals if they can be delivered immediately. If buyers are willing to wait for a few weeks, then selling prices are somewhat lower. This is definitely a seller's market.

This Week's Market

CENTS: The BU Lincoln series remains rather stagnant. There appears to be some limited buys for a few specific dates, but very few consistent buys. The 1945-P roll is the only date with a change; it is higher at $17.50 per roll.

NICKELS: The BU Jefferson series shows no signs of coming out of hibernation. Week after week, very few buys or sells are monitored. When rolls are offered at or near bid, they usually remain unsold. The lone exception this week is the 1950-D; still wanted by various dealers, some at a higher $195

DIMES: BU dime rolls remain unchanged, Mercury and Roosevelt, but both series appear stable. Offers to sell are infrequently monitored, let alone, at discounted levels. Original Mercury rolls continue to appear on some dealers' want lists at current levels.

QUARTERS: Although changes have not been noted this week, BU Washington quarters appear to be steady. Few, if any, rolls become available at below market levels, while, occasionally, dealers will pay bid for various dates. As long as there is no wholesale dumping of rolls at discounted prices, this series can be considered steady.

HALVES: Although several dealers are in the market for single Walking Liberty halves, common date rolls seem to be softer as many dealers feel the majority of coins within the roll will be lower-end, thus making rolls unprofitable at current levels. This goes chiefly for the 1941-45-P rolls.

DOLLARS: Ike dollars appear to be relatively weak as bidders drop their buy prices considerably. Blues have fallen slightly, while, the only thing that keeps Browns from dropping is that discounted sell prices have not been monitored except for mixed lots.

PROOF SETS and MINT SETS: Proof and mint sets remain stable at today's levels. The only exceptions finds 1970-S sm. date, 1979-S tII, and 1986-S Prestige proof sets lower and 1970 mint sets higher.

COMMEMORATIVES: The MS-64 and 65 columns for silver commems remain unchanged as buyers and sellers seem satisfied at current levels. There are a number of plus signs in the MS-63 column as one major buyer will take large quantities of each issue as long as they are properly graded.

TYPE: The type columns remain unchanged as dealers continue to take a "wait and see" attitude. However, when fresh material does appear on the market, and if it is priced within bid/ask levels for the grade, it usually sells quickly.

GOLD: This week finds a number of changes in the U.S. gold columns. The several minus signs for VF thru AU coins are a result of the uncertainty surrounding gold bullion. This recent bull market has turned a little bearish and spoiled the confidence of most dealers. Several plus signs appear in the MS-63 and 64 columns as dealers try to locate this material.

BULLION & FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $409.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-61 (UNCIRCULATED) Many bag marks may show only a weakness of luster. Should have full luster and are not overly abrasive.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-61 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-61 but with the additional feature of deep mirror prooflike surfaces both sides.

When Should I Buy?

In a recent Barrons interview titled "Aching Greenback" commodity analyst Al Friedberg predicts a weaker dollar and a strong bull market in gold over the next two years. It was Friedberg who forecase the decline of crude oil prices from $30 to $10 per barrell.

Proven Performance.

In previous bull markets in gold bullion, high quality U.S. gold coins have outperformed the metal itself. We have it on good authority that one of the nation's most influential hard asset advocates will soon be recommending and selling $20 Saints in MS-63 condition. Accordingly we believe that a substantial increase in demand for MS-63 Saints will result. Simple economics of supply and demand would seem to indicate a significant potential for price appreciation.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS 67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63- but may also include some MS 60 and MS 66 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

EAGLES REMAIN IN SPOTLIGHT
New Game, New Rules

The Market in Depth

After viewing a number of professional football games so far this season, I've come to the conclusion that professional football is not unlike the numismatic industry. Over the life of professional football, it has improved and progressed to the point where athletes are the best they've ever been and equipment is nearly as safe as it will ever be. Here is an industry that every year produces millions upon millions of dollars in revenue and payroll, yet, they are still trying to improve the game. One would think they should have perfected it by now.

Every year the NFL makes a few changes in the rules, hopefully, for the betterment of the game. Sometimes these changes make the difference in the final results of a specific game, nevertheless, these are the "new" rules. This year the NFL is using "instant replay" to help the referees make those difficult-to-call plays. Yet, is this really helpful? There have been any number of instances when the "instant replay" was used or not used and the final decision seemed quite contradictory to what was seen by the viewer. Is this an improvement or not? Only time will tell whether this method continues into the future or they try to improve the improvements.

You might ask how this relates to the coin industry. It is a perfect example of how rules change, hopefully for the better, when millions of dollars are involved in marketing decisions. To many it appears that grading changed as a way of getting dealers off the hook for selling overgraded coins in the past. Generally, this is not the case. Most dealers sold accurately graded coins for the time frame involved and had every intention of buying back coins from their customers at the same grade at which they were originally sold to the customers. But, when the market began to slip, the buyers started requiring nicer coins for their bids. This began to snowball throughout the industry---to the point where grading is very strict and might be as many as three grade points different than in 1980, in some series.

The biggest change can be seen in the number of bagmarks on a coin. There must be fewer today than in the past in order to fit into a higher grade category. This is a rule change. But, it is not intentional. It is meant to be a basis for grading consistency that can be used from here on out. And as grading services become consistent with each other, buyers will accept the companies whose grading is interchangeable and the others may eventually go by the wayside.

The future is the reason certified coins seem to be doing so well at this time. As we all know, there are no guarantees in life as good as death and taxes, but certified coins seem to be a step toward a better numismatic industry. Yet, most dealers feel more comfortable with their own grading, however, it's the new client or the non-expert who seem to be demanding coins with certification papers from a reputable service. Nonetheless, many well-known numismatic firms, who have been in business for decades, still base their reputation on knowledge, service, expertise and, their own guarantees.

This Week's Market

CENTS: Several late-date rolls of Lincoln cents are on dealer want lists at higher levels. Most needs range from 15 rolls up to bag quantities. The 1941-P roll is higher at $30 and 1960-P sm date is up to $75. Proof rolls of 1977-S and 79-S are also higher.

NICKELS: It seems that buyers and sellers have agreed on the wholesale market for BU 1950-D nickels. Recently they have met consistently at $195 per roll. The war nickel rolls seem sluggish at current levels with a couple dates declining mildly. The 1942-P roll rests a $400 and the 1943-D is at $110.

DIMES: The 1982 no 'P' dime is on want lists at higher bids for MS-63/$135 and MS-65/$190. Under BU rolls, the 1953-S and 1962 Roosevelts have suffered miniscule setbacks at $55 and $25, respectively. Mercury rolls continue strong at current levels, with MS-65 singles very much in demand at higher bids.

QUARTERS: BU Washington quarter rolls stayed the same this week as trading was very light. Bargain hunters don't bother with bids as they meet with unsuccessful results. Sellers will not give this material away.

HALVES: BU Franklin rolls are steady at today's levels with the exception of 1963-P's and D's. They have fallen to a lower $86 bid per roll. The earlier dates usually get absorbed by astute buyers when they become available. The Kennedy rolls from 1964 to 1969 remain stable to higher as several dealers try to buy quantities of BU rolls.

DOLLARS: Very few changes occur in the Morgan and Peace dollar columns. There is business being done in this series, but, it is being transacted by a very small percentage of the dealers. A few dollar rolls have adjusted downward as sellers lowered prices on 1879-S, 80-S, 81-S, and 82-S rolls.

Ikes have firmed up this week as a couple of dealers are back in at current levels in an effort to support this series.

PROOF SETS and MINT SETS: Proof sets are mixed this week as plus and minus signs appear for several dates from 1961 forward. The earlier sets remain stable. Mint sets are especially active for the years 1964-1967.

COMMEMORATIVES: MS-63 commems appear very active at current levels, while higher grades, although not weak, seem almost ignored for the time being.

TYPE: Granted that most type coins in upper grades are relatively rare, this area of the coin market continues uncertain. Regardless of the rarity factor, most dealers want a direction before they invest their funds and those of their clients.

GOLD: The prices for American Eagles listed below are for immediate delivery. This means "right now" for 1 oz. coins so delivery and premiums appear stable. But fractional coins, although prices mean immediate, deliveries may not be as prompt. Premiums are quite high at this time and should ultimately come down. In fact, "ask" prices are considerably lower for delayed delivery of fractionals.

BULLION & FOREIGN GOLD: (Modern & Restrikes. Traded in 8U Condition.)
Bullion raleted gold coins in this issua are figured on a basis of gold at $406.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-61. Must have eye appeal.

MS-63 (UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-63's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

$20 LIBERTYS

1904, MS65. A gorgeous example of a coin which is currently the object of fervent demand in the numismatic marketplace $8900

1907-D, MS65. Another exceptionally nice Liberty Double Eagle. This one boasts golden orange toning over creamy surfaces $8900

$20 ST. GAUDENS

THE MOST POPULAR BOOK FOR COIN COLLECTORS EVER WRITTEN ! !

Now available in a completely revised, more usable second edition that contains superb full color obverse and reverse photographs of hundreds of coins.

The first complete history of United States Type Coins....fully illustrated in color....a comprehensive, easy-to-follow guide to the most popular way to collect U.S. coins.

This complete "how-to" guide to the collecting of United States Type Coins has been completely revised and expanded—set up in a format that is clear, concise and understandable. Authored by Norman Stack, one of the acknowledged experts in the field; a man with 40 years of hands-on experience, who has also written 3 prior books and 263 auction catalogs.

"United States Type Coins" is illustrated in magnificent full color throughout, and printed on heavy weight fine paper. It's a beautiful, hard-covered volume that marks a new numismatic milestone. Nothing as complete, as accurate, as scholarly has ever been published. Every coin described is shown in color, obverse and reverse. And, since only the most superb specimens were selected for photographing, the book exhibits an absolutely spectacular array of U.S. Type Coins. There has simply never been a presentation like it.

This is a practical 102 page working tool which demands inclusion in any numismatic library; but so dramatically striking that it belongs on display rather than on a shelf. And it makes a most special gift for a favored friend.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

AUCTIONS COVER NOVEMBER CALENDAR

National Silver Dollar Convention Hits St. Louis

The Market in Depth

All of a sudden auctions seem to be occurring on a weekly basis. Auctions by Bowers and Merena just concluded their latest in New York City, which we will report on next week and McIntire Numismatic Auctions, will conduct one at the National Silver Dollar Convention, which takes place November 13-16th. However, Palm Beach Rare Coin Auctions, completed their sale November 7th and 8th at the Peach State Convention in Atlanta. Auction lot viewing appeared to have a constant waiting line and, as such, created active bidding during the sale. Although floor activity was busy, the "book" itself, was quite strong. This made for a better than expected price realization of over 1/2 million dollars. For a complete listing of prices realized please contact Palm Beach Rare Coin Auctions, in West Palm Beach, Florida. The following is a partial listing of auction highlights.

Denomination	Cataloguer's Grade	Price Realized
1864-L Indian Cent	PR-63	$ 7,260.
1864-L Indian Cent	PR-63	$ 7,920.
1838-O R/E Bust Half	PR-50	$27,500.
1940 Walking Liberty Half	PR-67/67 (ANACS)	$ 1,623.
1942 Walking Liberty Half	PR-65/65 (ANACS)	$ 1,210.
1895 $5 Gold Liberty	PR-65	$14,300.
1912 $10 Gold Indian	PR-67 (PCGS)	$42,460.
1916 McKinley $ Commem	PR-62 (PCGS)	$ 5,500.

As mentioned earlier, the National Silver Dollar Convention takes place this week in St. Louis---November 13 to 16. There are over 400 bourse tables with an additional 100 tables for the PCDA paper money bourse. This is the first year for this combined association. Dealers from all over the country are looking forward to attending this specialized convention. Yet, it is not limited to just silver dollars as all denominations are generally traded.

The October Monthly Summary contained a long run of plus signs for gem Mercury dimes. The majority of issues, from 1916-1929, were higher as bidders tried to pry coins loose from the hands of those who feel they have a long ways to go. Well, this month is only different because there are more plus signs and the levels are much higher. Every issue from 1916 thru 1931, is substantially higher (some up as much as 30% or more) and many other issues after 1931 have increased. Moreover, the consensus from most bidders is, they are still having a very difficult time locating most of the early mintmarked issues, while the 'P' mints pop up occasionally. These dramatic price increases appear to reflect the true rarity of strictly graded specimens, according to several major dealers.

This Week's Market

CENTS: The inactivity in the Lincoln series is readily apparent by the number of changes in bid levels this week---none. Very few buy messages are reported; and when they are, they are usually of the bargain-hunting nature.

NICKELS: BU Buffalo and Jefferson nickel rolls indicate no changes this week as dealers concentrate on more active areas of the market. The difference between these two series is that Buffalo rolls are readily saleable at current levels, while bidders for Jefferson rolls are not active at all.

DIMES: There is a lack of constant bidding for original Mercury dime rolls, but this is not an indication of a slow market. If an occasional roll or two are offered at anywhere near the bid/ask levels, they are quickly purchased by any one of the many marketmakers.

BU Roosevelt dimes are less active, but relatively stable at today's levels except for 1955 and 1959-D rolls, which are lower this week.

QUARTERS: BU Washington quarter rolls, which had remained steady for the last couple of months, are again showing signs of weakness. The lack of minus signs recently was considered a positive aspect within this series, yet, this week's minus signs will definitely be viewed as an indication of a declining market.

HALVES: This week finds a few dates within the Walking Liberty series at lower levels. The 1942-S, 43-S, and 47-P rolls have fallen to $4500, $4400, and $3200 bid, respectively.

The Franklin series shows no changes, while Kennedy rolls also remain unchanged.

DOLLARS: MS-60 'S' mint dollars (1879-S to 82-S) have found their way to recent lows this week after last weeks drop in rolls of the same. Several common date rolls have declined to $515 bid. In the MS-64 and 65 columns a few minus signs can be found. In many cases, various coins have been offered at discounted levels, only to go unsold.

PROOF SETS and MINT SETS: These two areas of the market remain solid at this time with most trades taking place within current bid/ask levels. Occasionally, various mixed lots will become available a little off bid, but quantities are quite limited.

COMMEMORATIVES: The 1982 Washington commems are now bid at $14.50 each as one buyer continues to buy everything offered on the teletypes. Statue of Liberty sets are showing renewed life as three-piece proof sets increased to $365 bid and although six-piece sets are lower at $875, they seem to be actively traded at this level.

TYPE: This area remains sluggish in the higher grades as bidders fail to maintain their once high buys. As a result there are a few changes to the downside, especially in the area of nickel coinage.

GOLD: Premiums are beginning to settle somewhat for the Eagle coins as supplies are being distributed to dealers who are then able to deliver to clients. The 1/2 oz. coin is the exception as bid increased with no ask at this time. There is some speculation that this coin will have a limited mintage and carry a higher than expected premium. But, as the year ends, one does not know what the government will do. They could finish the year minting only 1/2 oz. coins.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (EXTREMELY FINE) Will have even overall wear. Light marks may show on a high point of the design and have lost some detail. These are well above average coins.

MS-63 (CHOICE UNCIRCULATED) Will have only a few small bag marks and may show minor signs of wear on the highest points of the design. Must have good eye appeal.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and hairdet feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck - and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 -but may also include some MS-60 and MS 65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

AMERICAN EAGLES-BULLION OR RARITIES?

Market Sluggish, Lack Of Funds Cited

The Market in Depth

The original intent of the American Gold Eagle was to compete with foreign gold coins as close to bullion prices as possible. This would serve to keep more U.S. dollars at home, while treating the gold investor or American Patriot to an attractive U.S. gold coin. Somehow the low premium theory got lost in the hands of the "Approved Purchasers"---the main distributors. Coin dealers are quite accustomed to two-way buy/sell markets. The majority are willing to work on close spreads. However, it seems the main distributors of the Eagles work on the retail theory---sell at whatever the market will bear and they don't have to buy back. Tremendous national and even international demand has been created, not only by advertising, but, by the publicity given to the Eagles in almost every newspaper and magazine across the country, along with television news reports.

Now, there is speculation that 1986 dated coins may be minted into 1987. This is being referred to as the "Date Freeze". This is definitely a two-sided sword. The more coins are minted will cause eventual lowering of premiums. Yet, if more coins aren't minted, then the government will have created a rare coin, not a bullion coin, as intended.

Some dealers are considering boycotting the American Eagles and just letting the distributors charge the customers the high premiums. The ultimate consumer is the one who gets hurt, one way or the other, as the high premiums they paid because of excessive demand will most likely fall if the government continues to mint 1986 coins in 1987. At this point, the coin dealers, in order to make a profit (which is a prerequisite to staying in business), end up doing the dirty work for the distributors by having to charge their customers these high premiums. The distributors make wind-fall profits, which again was not the original intent of the program.

The coin business will ultimately suffer from these abuses because most of the distributors will not have a ready two-way market. They will not buy, just sell. For example, at 2:15 p.m. PST, one of the main distributors was called (in California) and we were told that they could not give us any prices after 1:00 p.m. So, if the consumer wants to sell, he or she will, most likely, have to visit a coin dealer in order to get a close buy/sell spread. The consumer will probably feel victimized by the dealer who offers a $410/$430 spread, as the consumer may have paid $475 or more from one of the main distributors originally after adding all commissions and premiums. This presupposes gold has not changed, which, indeed it has at this writing.

To freeze the 1986 dated coins or not . . . ? There is no correct answer that will satisfy both arguments. What we might learn is that the premiums should have been fixed and quantities minted sufficient enough to satisfy demand as bullion coins, not rare coins. Some dealers argue, "if 1986 Eagles are allowed to be minted in 1987, why not mint 1916-D dimes again, or . . . ?"

Due to space and time limitations, we apologize for the short coverage of last week's two auctions. Auctions by Bowers and Merena realized nearly $3 million. A few highlights follow:

Denomination	Cataloguer's Grade	Price Realized
1882 Seated Quarter	MS-65	$ 5,500
1879 Seated Half	PR-65	$ 5,720
1879 Morgan Dollar	PR-65	$ 7,920
1879 $4 Gold Stella	PR-60	$27,500
1915-S Pan Pac $50 Gold (Round)	MS-60	$30,800
1936 Norfolk	MS-65	$ 1,045
1928 Oregon	MS-65	$ 990

The McIntire Auction was held in St. Louis, with a total price realized of nearly $720,000. The following highlights were noted:

Denomination	Cataloguer's Grade	Price Realized
1878-CC Morgan	MS-65	$ 3,960
1879-CC Morgan	MS-64/65	$ 5,720

1884-S Morgan	MS-63 Semi P/L	$ 7,920

This Week's Market

CENTS thru HALVES: BU rolls of cents thru half dollars saw very little action this past week as they generally took a backseat to the auctions and the National Silver Dollar Show. The few changes tended toward the downside except for 1957-D dimes at a higher $84 bid and a few Franklin rolls which also increased (1956, 57, and 59).

DOLLARS: The National Silver Dollar Show was large and well attended, but the market continues in the doldrums. This is evidenced by the fact that silver dollar rolls are sluggish as buyers are awfully picky. Several dates in MS-64 are becoming difficult sellers and some of the higher buyers are conspicuously absent. Rare date coins are still difficult to locate and will command bid or higher in MS-63 and better grades.

PROOF SETS and MINT SETS: This week finds trading rather slow in these areas, although proof sets prior to 1960 are still on a few want lists at current levels.

COMMEMORATIVES: MS-64 commems are mixed as several issues have fallen to recent lows. However, the majority of the Oregon issues are higher in MS-64 and 65 as one major dealer attempts to strengthen his position in this series. Other dealers report selling him every coin they can locate. There are several adjustments in MS-65 gold commems as the higher buyers fail to substantiate their bids.

GOLD: The American Eagles are selling so well that many dealers feel this is having a strong impact on the rare coin industry. Many coins are being sold at lower levels causing prices to fall, which weakens the overall market. Funds are removed from rare coins and put into gold Eagles and other bullion, thus hurting the near-term outlook for the rare coin industry. Many may consider now a time to buy bargains at these lower levels.

BULLION & FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $388.80 per ounce.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS 60 (CHOICE UNCIRCULATED) Will be sharply struck, with average amount of mint or original luster. May exhibit some contact marks or bag marks, but will have above average eye appeal. Must have full luster. These are well above average coins.

MS 63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show one or two small contact marks, but will have full luster, eyeappeal of strike, & should have full luster. These are well above average coins.

MS 64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor sheen spoilers. Definitely nicer than an MS 63. Must have eye appeal.

MS 65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS 65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS 63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics of the MS 63 but with the additional feature of deep mirror proofline surfaces both sides.

MS 65 PROOF LIKE (GEM UNCIRCULATED PROOF LIKE) Will exhibit the same characteristics as the MS 65 but with the additional feature of deep mirror prooflike surfaces both sides

MS 67 & MS 67 PROOF LIKE (SUPERB) Will be 100% fully struck —and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63 but may also include some MS 60 and MS 65 examples. For strictly graded MS 65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Bid prices are for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

Common BU Dollar Rolls Under Selling Pressure

The Market in Depth

AN OPEN LETTER TO THE NUMISMATIC COMMUNITY:

The Coin Dealer Newsletter, now, and in the past, has reported Bid and Ask levels for coins graded by the prevailing standards at the time of publication. Each bid listed represents the price the highest bidders are prepared to pay for a coin that meets their particular grading criteria, within reason. (If buyers are found to be too fussy in their expectations and are not buying the majority of full grade coins being offered to them, then we do not accept their bids as authentic). Due to the subjective nature of coin grading, however, one person's MS-65 may be different from that of another person. In fact, out of all the coins rejected by buyers, the majority of those are rejected for reasons of grading, which indicates differences of opinion on grading may be the rule, rather than the exception.

For a variety of reasons,grading standards, or their interpretations, have undergone a steady evolution towards greater conservatism over the past decade. In 1975, only one mint state grade was represented in the CDN. By 1986, this had been increased to four. Each additional grade has brought about further refinement in the grading process. It is a fair statement to say that many coins correctly graded according to prevailing market standards as Proof or MS-65 in the 1979-1983 period would probably grade 63 or less by today's stricter standards. Likewise, many coins correctly graded as Mint State or Proof-65 in 1984 and during most of 1985 (especially gold in 1985), would probably be considered 64's or high end 63's by current standards, and, therefore, no longer valued at current 65 bid levels.

Furthermore, in the past, the majority of dealers graded coins as strictly as market standards allowed. It was not their intent to change grading, but to satisfy the wishes of the coin buyer. When the buyer wanted a nicer coin, he rejected coins of lesser quality. The dealer does not want to have to make excuses, ever again, for coins he has sold. However, it is unrealistic to expect any dealer to repurchase coins sold by him in 1981 (for example), using 1981 grading standards, at today's CDN prices, which are based on 1986 grading standards. Today, the marketplace is determined to keep this consistency, now, and well into the future.

This trend towards more conservative grading has been evolutionary, and should result in a benefit to coin buyers as a whole. It has, however, been the source of much confusion, and has resulted in misunderstandings between many dealers and their customers. Hopefully, this letter will serve to eliminate much of this confusion.

One additonal point: Coins that were intentionally overgraded in the past would not fall under this grading conservatism. If an individual intentionally overgraded coins he sold in the past, thus, creating a fraud, then that individual must be dealt with through the court systems, as he does not have the best interests of the coin industry at heart.

This Week's Market

CENTS: BU Lincoln rolls indicated no changes for this past week. Dealers continue to ignore this series as they feel it will tie up their money too long in dead inventory before it ever begins to move upward.

NICKELS: The BU Jefferson series remains just as quiet as the Lincoln series although, 1950-P rolls are higher, due to one strong buyer who places no restrictions on quantities (bid is now $24 per roll). The 1950-D also continues active within current levels.

DIMES: In the BU Roosevelt series, most dates are stable at current bids with the exception of 1953-S, 54-S, and 55-S, all toward the downside at $53, $50, and $50, respectively. Original Mercury dime rolls are still easy sellers at today's levels.

QUARTERS: BU Washington quarter rolls are seeing very little action at this time. The 1941-D roll is lower at $825 bid. In the late-date silver rolls, 1961 thru 1964, are all to the downside at $49 bid.

HALVES: The half dollar market is stable in most dates with very few rolls even being offered. On the other hand, some dealers are not attempting to bid on rolls as they feel results would be less than satisfactory unless they offered well over bid for the dates they wanted. The 1970-D, Kennedy roll, is now bid at a higher $270.

DOLLARS: Common date dollar rolls are suffering from a general lack of interest. Unless they contain a number of premium coins, most rolls go unsold at current levels. Most common rolls must be discounted if they are to sell. This, of course, has an adverse effect on MS-60 singles---they declined also. Along with the faltering common dates, several others have become difficult to sell.

The American Silver Eagle is about to be released and the situation appears no different than with the Gold Eagles---premiums are varied and will temporarily be considerably higher than expected. As of this writing, silver is $5.27 per ounce and dealers are trading the 1 oz. silver Eagles at $8.50 each. In order for the dealer to make a profit, the consumer will initially have to pay an extravagant premium for one ounce of silver that he can buy in other forms for $3 less per ounce.

PROOF SETS and MINT SETS: These two areas remain steady at today's levels as many dealers will pay right at bid for most issues. Suddenly, the 1984-S proof set is short on supply and bid has risen to $16.

COMMEMORATIVES: Silver commems show few changes in all grades. The Oregon issues, in MS-64 and 65, are the exception as most dates are higher.

TYPE: Mint state type coins continue to show sporadic minus signs; mostly in areas where coins are readily available. This doesn't mean they appear in every showcase at a coin show, but, if a few are needed, they can be found with just a little effort. Proof type seems to be rising in the rarer coins while the common issues are being ignored or sold at lower levels. The rarity factor is something most dealers have been speaking of for quite some time now.

GOLD: U.S. gold may not be tied to the bullion price, but, when gold goes into a bear market, U.S. gold certainly is affected by the decreases. There are numerous minus signs for VF thru AU coins, and even the twenties in MS-60 are lower.

BULLION & FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $382.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

Buyers Looking For Eye-Appeal Coins

The Market in Depth

The BU roll market remains in the doldrums. However, selling lists have not been plentiful in recent weeks. Most likely, the owners of rolls have decided to hold their positions rather than sell into this currently sluggish market. Moreover, bidders for rolls are generally of the bargain-hunter types. Neither strategy helps this area of the market and the longer performance remains so, the longer dealers, and their clients, will lack confidence in this market.

These past few weeks have seen a downturn in BU dollar rolls. As more and more rolls, and even bags, are picked through and stripped of the higher quality singles, this leaves the individual rolls with little more than MS-60 - MS-62 specimens. This, along with a general lack of interest in MS-60, 61 and 62 coins are the chief causes of lower price levels for the majority of common dates (MS-60's and rolls).

Speaking of minus signs, the type charts indicate several losses scattered up and down the MS-63, 64, and 65 columns. These new lower prices continue to reflect the current general lack of interest in type at these previous bid levels. It isn't so much that there are large quantities of coins available, it's just that the number of coins available at current levels seem to sit in inventory with no new buyers.

Not all type coins are suffering from this downturn. Rarer types and beautifully toned coins will still command on the spot sales. Original patina, which is very eye-appealing, will always attract the collector initially. It may even allow inconspicuous marks to appear unimportant to the buyer. And, spectacularly toned coins, which can be purchased at reasonable levels during a down market, may eventually command multiples of bid in an up market. This, of course, holds true, not only for type coins, but for coins in almost every series.

The few type coins which have seen plus signs of late, are quite rare in proof, let alone, in the upper spectrum of quality:

In the Copper-nickel Cents (1860-64), the total mintage is only 3,380 pieces and any little spotting will turn-off a potential buyer for PR-64 or 65 specimens. And mintages are so low for Three-Cent Silver (TII), Liberty Seated Half Dimes (w/stars), and Liberty Seated Dimes (w/stars), that buyers here rarely encounter anything above PR-63 specimens. Needless to say, bids can continue to increase with no new coins coming on to the market.

Premiums on the 1/2 oz. and 1/4 oz. gold Eagles have fallen, even though the gold price rose this past week. The 1 oz. silver Eagles have a wholesale spread of $8.75/$9.25.

This Week's Market

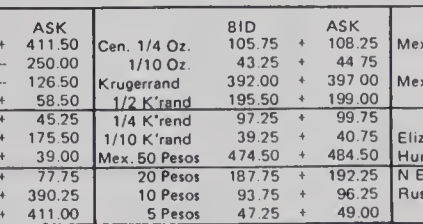
CENTS: Conditions have not changed, this past week, within the BU Lincoln roll series. A lack of bidding, or even selling activity, keeps this series very quiet.

NICKELS: The main activity in the BU Jefferson series---the only activity---is with 1950-P rolls. Bid has now jumped to $27 per roll. This roll was just $20 less than one month ago.

DIMES: BU Roosevelt dimes are in a sluggish state. This week finds 1955-P and D rolls at lower bids of $78 and $58, respectively. At the beginning of 1986, these rolls were bid $95 and $72, respectively. This is an indication of how the Roosevelt series has fared this year, in general.

QUARTERS: BU Washington quarter rolls have not perked up any. However, the only roll on the downside this week, is the 1955-D roll, at $140 bid. It's going to take a brand new year, and probably, consistently higher bullion prices to trigger another bull market in this series and other series of BU rolls.

HALVES: There are a lack of changes for BU half rolls, but this area is no different than the other series---not much activity, either buying or selling. One positive note: Sellers are not willing to discount rolls to bargain-hunters.



DOLLARS: There is a whole rash of minus signs in the Morgan and Peace dollar series. These minuses cover a variety of dates throughout the MS-63, 64 and 65 columns. Some dealers are finding it very difficult to sell many of these dates at current levels, thus, the minus signs.

PROOF SETS and MINT SETS: For the most part, proof sets are stable at today's levels, although the 1954, 1970-S sm. date, and 1981-S TII sets have minus signs. The 1984-S is higher again this week at $17 bid. There are no changes in the mint set columns as prices remain steady.

COMMEMORATIVES: Silver commems are fairly stable at today's levels, although much of the bidding is such that buyers are trying to "pick-off" bargains. Yet, several dealers are bid-buyers for most issues in the MS-63 to MS-65 grades. The Oregon issues remain very active, most at higher levels.

TYPE: Proof and Mint State type coins (63 thru 65) are suffering from a general lack of interest. Not only is the time of the year a factor, but, some dealers feel many issues are overpriced. One of the main problems here is still grading between the buyer and seller. The buyer must like the coin more than the seller, in order to create a transaction.

GOLD: There are a few adjustments in bid levels for high grade U.S. gold, but, generally speaking, this is a very solid market. The only reason a high grade U.S. gold coin may not sell is usually because the seller wants too much money. This week finds many plus signs in the VF and XF grades, in most denominations.

BULLION & FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion releted gold coins in this issue ere figured on e basis of gold at $394.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60: (Mint CIRCULATED) Barely uncirculated specimens showing no evidence of rub or friction. Handsome, no further qualifications are necessary. It will be bag marked and/or cabinety or it may not have full lustre.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

INVESTORS, TELEMARKETERS, FINANCIAL PLANNERS DEALERS, COLLECTORS

Please contact us for daily 2-way liquid markets on accurately graded PCGS coins. We have approximately 2500 coins in PCGS holders in inventory at the present time for immediate delivery.

Every PCGS coin is graded by a minimum of four of the world's top rare coin grading experts (and grade verified by a fifth expert). A minimum of three of these experts must agree on the grade of a coin before a grade is assigned by PCGS.

If you would like to receive our weekly buy/sell quotes, send us your name, address and telephone number. If you wish to buy or sell coins today, call us for our competitive quotes.

Unlike the other grading services, where their liability ends when they have graded the coin, PCGS guarantees the grade of each and every coin.

We are currently one of the 53 active dealers who must make a two way market. These dealers have combined numismatic experience of over 800 years and they've sold over 4 billion dollars worth of rare coins. Joel Rettew has been buying and selling Rare Coins since 1953 and is a major market maker in PCGS coins.

PCGS coins are accepted by some lenders as collateral without further appraisal or grading. Get in on the the ground floor with the designer coins of the 1990's.

We will be able to supply you with the new U.S. Gold Eagles at very competitive prices with immediate delivery.

We've conveniently located with offices in Newport Beach and Palm Springs.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 --but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Bid prices are for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

PREMIUMS FALL ON GOLD EAGLES
Premium Remains High On Silver Eagle

The Market in Depth

Is the dollar market dead as some dealers proclaim? Hardly! Yes, prices are generally lower. Some dealers and investors may be taking profits; others may even be taking losses as they fear the anti-dollar campaign. Dollars have enjoyed such a long profitable run that now when prices are moving in the 'wrong' direction, many fear the run is over. Even though prices may be lower, what other series enjoys so much competiton for coins that customers want to sell? Whether customers take their dollars to coin shows or their nearby coin shop, dealers will almost always make an offer. And, if the customer thinks this offer is too low, he has the option of going to another dealer. No other series enjoys this competitive popularity. And keep in mind, when this area of the market heats up again, every dealer will be a dollar advocate.

The December Monthly Summary contains a long list of plus signs for MS-65 (non-bands) Mercury dimes from 1916-1939. The earlier issues, Pre-1929, especially the mintmarked issues, are so very difficult to locate in strict gem condition that most dealers, who make a market in gem Mercuries, are willing to pay whatever they have to in order to purchase the few specimens that become available. Many dealers tell us that the only dates they find on a somewhat regular basis are a few of the 'P' mints and issues dated after 1928. And the early 'P' mints are found only occasionally, and generally, not in large quantities.

Some of the issues that dealers remember seeing in fairly substantial quantities, or, even roll quantities back in the late '70's, do not make today's MS-65 grade. Dealers may remember coins with lots of flash, but, back then little marks did not mean as much as they do today. Moreover, most dealers and clients overlooked MS-65 specimens, as they felt them to be inferior to "full-band" specimens. The term "inferior" can no longer be used in connection with gem MS-65 specimens, as there are now many more dealers involved with non-band Mercs than there are who deal in full-band coins.

Premiums have fallen drastically on American Eagle gold coins. The 1 oz. is now wholesaling at the 4% over bullion it was originally set up to trade. The 1/2 oz. has fallen from $285 wholesale to $218, while bullion has dropped just $16. The 1/4 oz. is down $30 to $120 in just 2 weeks. The 1/10 oz. has held its premium pretty well, probably because it is more popular for holiday gift-giving.

The falling of premiums on the gold coins may be an indication of what will happen to the Silver Eagles. With silver at $5.38 an ounce, the Silver Eagle is wholesaling at $9-$9.25 each. To make any money the dealer must charge at least $10 each. How this is supposed to compare to other silver bullion which trades at the $6 level to customers is beyond the comprehension of most silver investors. Dealers are caught in the middle. They don't like the high premiums, but they must give the customers what they want.

This Week's Market

CENTS: Dealers have resigned themselves to the fact that BU Lincoln rolls are not going to be active for awhile. In fact, this area is so quiet that even bargain-hunters ignore it. Lest you feel all Lincoln cents are in this category, don't be concerned. Better-date, early Lincoln singles, trade in all grades, very actively at current levels.

NICKELS: BU Jefferson nickel rolls remain very quiet except for the 1950-P roll. This issue has now moved to higher, much higher, $35 bid. Apparently, there are not as many rolls available as some dealers believe. On the other hand, war nickel rolls are soft. The 1942-P, 43-P, and 45-D rolls have all retreated somewhat this past week.

DIMES: Various dates within the BU Roosevelt series have once again sold at lower levels. It is reasonable to think that their continued lack of activity have caused these dates to weaken. This, of course, means others may follow in the upcoming weeks.

QUARTERS: BU Washington quarters finds a short list of minus signs beginning at 1954. Some dealers feel it is time to sell various dates and get what they can before they go lower. It is felt that until silver gains some strength, BU rolls may sit and wither for awhile.

HALVES: BU W.L. half rolls appear to have reached a balance between buyers and sellers. There are constant bidders at today's levels and most sellers don't find rolls difficult to trade unless they are put-together rolls.

BU Franklin rolls have minor changes, and 1964 Kennedy rolls are down to $55 bid. The 1970-S PR. roll, is now bid at a higher $125.

DOLLARS: Changes are minimal throughout dollar singles, that is, up until MS-64 and MS-65. Then, several minuses occur for issues that many dealers feel are overpriced and the higher bidders have dropped their buy prices. BU dollar rolls seem to be a little more stable now as buys are monitored at the $500 level and higher.

PROOF SETS and MINT SETS: The majority of proof and mint sets are active at current bids and in some cases, even higher as dealers need to fill orders before the holidays. After falling last week, the 1970-S sm. date proof sets were monitored at $75 between dealers.

COMMEMORATIVES: Price changes are not in strong evidence for silver commems, but this is not an indication of a lack of interest. Many dealers try to buy coins at discount levels, only to discover that sellers aren't that easy. Therefore, to satisfy want lists, many dealers will pay current bids.

TYPE: Type coins indicate fewer minuses this week as buyers have returned to the scene at current levels for the majority of issues. Many dealers feel that the first of the new year will bring renewed interest. The current downturn may be just a sign of year-end doldrums.

GOLD: U.S. gold finds several price adjustments, all the way from VF thru MS-65. Again, this reflects somewhat a lack of interest at this time of the year for the higher grade coins and a drop off of bids by many of the higher buyers.

BULLION & FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $390.20 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely richer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

WINNER OF "The BOOK OF THE YEAR AWARD 1986" from the NUMISMATIC LITERARY GUILD

YOU CAN MAKE MILLIONS IF YOU WIN THE RARE COIN MONEYGAME.

There's a fortune to be made investing in coins. And now in one remarkable volume, coin authority Scott Travers—author of the award-winning bestseller *The Coin Collector's Survival Manual* and President of Scott Travers Rare Coin Galleries, Inc.—shares secret winning strategies.

Full-Color Grading Guide Worth Millions Alone

For the first time ever, a full-color guide to the grading of United States coin Types has been published in a book. The color reproduction is so crisp and clear, you'll think you'll be able to lift the coins right off the pages. You'll learn how to grade proofs with amazing $25,000 coins, learn about original toning by viewing Liberty Seated halves in unusually high grades; learn about wonder coins and "apparent wonder coins" by examining breathtaking Barber halves—and much, much more.

With the assistance of amazing enlargements, you'll see what it really takes for an MS-64 grade, as well as what Morgan dollars and Saint-Gaudens double eagles should look like to grade MS-65. You'll see what strike, luster, and toning are really all about. And your ability to spot light, high-point wear will be refined.

Heritage Capital Corporation provided over 4,000 color illustrations to choose from, and Scott Travers meticulously selected the best representative examples of each coin grade and describes them objectively. Dozens of color photographs are presented. Meticulous descriptions, color enlargements, and arrows train you in the intricacies of grading.

Scott A. Travers

"Mr. Travers has already emerged as a coin dealer and author of considerable influence. He also has established himself as perhaps the preeminent consumer advocate in the numismatic field."—*The New York Times*

Anthony Swiatek, *Swiatek Numismatic Report*, calls *Rare Coin Investment Strategy* "By far the best book ever written solely about coin investment." And James L. Miller, *COINage* magazine, calls it "A vital guide. Highly recommended." Ed Reiter, *The New York Times*, says "*Rare Coin Investment Strategy* is required reading for anyone planning a foray into the land of cartwheels and double-eagles."

So if you want to stop moving around the rare coin moneygame board, not knowing the rules by which the others are playing, you need *Rare Coin Investment Strategy*. So you can learn the rules, play the game, and win.

MS 65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS 67 & MS 67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63 - but may also include some MS-60 and MS 65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Bid prices are for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

SEASONAL MARKET REMAINS ACTIVE

Happy Holidays—— Last Issue Of 1986

The Market in Depth

As this is our last issue of 1986, we would like to take this opportunity to wish everyone a happy and safe holiday season. Have a healthy and prosperous 1987! Your next issue will be dated January 2, 1987.

The year ends, not unexpectedly, on a somewhat quiet note, as the majority of dealers concentrate on holiday type sales. Most coin shops are selling gold and silver gift items, especially Eagles, and jewelry. Their rare coin inventories are neglected, thus, causing wholesale dealers to slow their businesses down to a virtual standstill. Many investors (dealers also) are closing out their "books" for the year, delaying any additional purchases until 1987 rolls around.

Last week saw Stack's conduct their final U.S. coin auction of the year. Bidding was brisk as many buyers wanted to take advantage of what they felt were year-end bargains. Moreover, there were numerous prices realized which are pertinent to today's bid levels. The following prices realized are but a few of the highlights of this auction:

Denomination	Cataloguer's Grade	Price Realized
1869 3¢ Silver	Choice Brill. Proof	$ 1,210.
1835 Bust Quarter	BU	$ 1,430.
1879 Seated Quarter	Ch. BU	$ 935.
1923-S Standing Lib. Quarter	Gem BU-FH	$ 4,180.
1924-D Standing Lib. Quarter	Gem BU-FH	$ 3,740.
1828 Bust Half	Ch. BU	$ 1,760.
1876-CC Seated Half	BU	$ 1,210.
1893-O Barber Half	Ch. BU	$ 1,320.
1896-S Barber Half	Ch. BU	$ 3,740.
1897-O Barber Half	Ch. BU	$ 2,860.
1897-S Barber Half	Ch. BU	$ 2,860.
1919-S W.L. Half	BU	$ 1,760.
1795 Bust Dollar	BU	$19,250.
1856 Seated Dollar	Brilliant Proof	$ 5,060.
1838-C $2½ Gold	AU	$ 2,310.
1911-D $2½ Gold	BU	$ 5,280.
1866 $3 Gold	BU	$ 4,950.
1908-S $5 Gold	Ch. BU	$ 6,875.
1796 $10 Gold	AU	$14,850.
1907 $10 Gold W/E, Per.	Ch. BU	$12,650.
1907 $10 Gold R/E Per.	Gem BU	$35,200.
1911 $10 Gold	Matte Proof	$ 9,350.
1913-S $10 Gold	Gem BU	$39,600.
1933 $10 Gold	BU	$57,750.
1931 $20 Gold	Ch. BU	$20,350.

American Silver Eagles are now listed on page one of the CDN. They are in the silver section at the bottom right-hand corner. Trading continues very active with premiums now beginning to fall as more coins become available. As one might guess, some errors have already been discovered. Blank planchets have been found and one dealer will pay a minimum of $40 each.

CENTS: The BU Lincoln market found no changes this week as trading remains almost non-existent. To say this area of the coin market is soft would truly be an understatement.

NICKELS: Same as last week; very little activity in BU Jefferson rolls. However, the 1950-P roll is up again, now at $44 bid. Two, obviously strong buyers are attempting to outbid each other for available rolls.

DIMES: Original Mercury dime rolls continue to trade at bid levels, however, higher bids have not been monitored. Activity is sparse in the Roosevelt series with only the 1959-D at a higher $38 bid.

QUARTERS: Changes can be found in the Washington series as more dealers discount various dates and quantities. The 1945-P roll is lower at $190 bid, while several late-date silver rolls have fallen (1956-59).

HALVES: The BU Franklin series sees no improvement as several different dates were offered for sale at lower levels. The 1954-P and 58-D rolls are lower, as are all issues from 1960 thru 1963 (P & D mints).

DOLLARS: Numerous MS-64 and 65 Morgan dollars have fallen as top dollar market makers refuse to support many dates at previous levels. They obviously feel prices are too high and find it difficult to sell them at higher levels. This is not only affecting the common dates, but some of the higher priced issues as well; especially the Carson City issues. One area that is not weak is MS-65 prooflike dollars as several dealers are still more than willing to purchase any and all properly graded specimens, that may come available, at current bid ranges or higher.

PROOF SETS and MINT SETS: This is a very active area this time of the year. The late-date sets are reasonably priced so they can be used as stocking-stuffers and the expensive sets are purchased for the more advanced numismatists.

COMMEMORATIVES: Silver commems realized few changes this past week. The Norfolk is higher in MS-60 and 63, while a few of the Oregon issues are higher in MS-65 (1928, 33-D, 34-D, and 36-S). The 1939 Oregon set is higher in MS-64.

TYPE: Very few changes can be found on the type charts. Some small denomination issues still appear a little soft, while larger denominations (quarters and higher) appear somewhat strengthened.

GOLD: U.S. gold continues to muster a few adjustments in high grades. Twenty-dollar Saint Gaudens seem to be suffering the most as more coins become available at lower levels. Several issues in AU condition have minor setbacks. The American Gold Eagles are continuing to tighten spreads as premiums fall again.

BULLION & FOREIGN GOLD: (Modern & Restrikes. Treded in BU Condition.)
Bullion releted gold coins in this issue ere figured on a basis of gold at $395.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark--these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices--particularly the pre-1941 issues. Washington rolls--dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-64 Will be sharply struck and have full lustre (bright or original toning). May exhibit some field distractions, but none major. May have a few minor carbon marks. Definitely better than an MS-63. Must have eye appeal.

MS-65 (FULL UNC BU GRADED) Will be sharply struck and have full lustre (bright or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast features. MS-65's are only a small (but varying) percentage of average uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (ONCE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional features of deep mirror proofline surfaces both sides.

MS 65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 -but with the additional feature of deep mirror prooflike surfaces both sides

MS 67 & MS 67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63 -but may also include some MS-60 and MS 65 examples. For strictly graded MS 65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.
